

Information Technology Services

TEACHERS ON THE WEB

Sponsored by Information Technology Services, Teachers on the Web is designed to help teachers harness the power of the Internet as a communication tool. This project provides free web space on the M-DCPS Internet server for teachers. Your site will be a subsection of your school's site, and you can update it as often as you like.

After receipt of this form as an attachment, through an Internet Service Request (Employee Portal – Applications, Services and Sites) you will be contacted to establish your site's access to the M-DCPS Web server. The Technology Learning Center provides free online courses on website creation at: <http://tlc.skillport.com/skillportfe/register.action>. Internet Services reserves the right to disable any web page contrary to the policies and guidelines of M-DCPS.
